Candidate Introduction and Motivation:

Summary of Phillip:

Phillip was interviewed on 28 September 2018, and the interview is summarised as follows:

He came across very professional, well organised and well prepared. He currently resides in Johannesburg, is married and has one dependent who lives with his mum and attends school in the nearby neighborhood. Phillip is also presently studying further accounting and finance related paths and is due to write exams towards the end of October. He has some great international experience which includes safari operations and has worked in Botswana previously based out of Maun as finance controller and general manager for a safari operator. He also looked after the logistics and transport section of this particular safari business. His commercial awareness of the safari market and industry is good. He comes recommended in the service of operations and understands the culture of the region well who continually supports all lodge staff in every aspect of financial management, but also general operational control.

He appears to be a very professional gentleman, well spoken and respectable individual.

I have discussed his family situation with him, and he has assured me that living away from home is not a problem, as it has been the case for some years already as a result of having to be flexible to accommodate his work and career development in the past as well as for the future.

Reference letters, due diligence and background checks.

This letter serves to confirm that Phillip Maphosa is a past employee of Tailormade Safaris (www.tailormade-safaris.com) a bespoke safari company operating camps in Mana Pools and Hwange (Zimbabwe) as well as a travel planning company in Botswana. Phillip was the general manager for the company, covering both the safari and trucking side. Due to downsizing and downturn of business, we had to release him to allow him to pursue other energies and interests to him. His duties included, amongst others: compiling and interpreting monthly management accounts, budgets and forecasts, interpretation and management of the monthly expenses, hiring, and training and exit interviews for all employees and running the company payroll. He was employed in above capacity from December 2012 to December 2014. I would recommend him for any finance or audit position as he acquitted himself well, despite the tough and unique challenge and operating environment he encountered.

Regards, Hump
